Safety and Health Days 2011 – Closeout

If you missed the opportunity to review the training material for KSC's Safety and Health Days 2011 program, it can be viewed at:

<http://nasa.ksc.nasa.gov/safetyhealth/index.htm>

The staff worked very hard to bring to you additional CPR/AED internal certification courses and the very thought-provoking Fall Protection Roadshow. We are pleased to announce that **31** individuals completed the internal CPR/AED certification and more than **200** people attended the Fall Protection Roadshow! Feedback from attendees included that the training and demonstrations were "very informative", "entertaining," and "to-the-point." If you did not have the opportunity to attend one of the CPR/AED training sessions, please contact your training coordinator.

This year's program also offered **24** safety- and health-related booth setups. The booths were sponsored by Institutional Safety, the KSC Fitness Center, RehabWorks, Human Engineering Modeling and Performance (HEMAP), Fire, Security and Emergency Management, Life Sciences, and the NASA Safety Reporting System. For more information on any of the topics presented at the booths, please contact the *Lookout* POCs.

Feedback

We would like to hear your thoughts on this year's Safety and Health Days program as well as suggestions for future programs. Send your comments to the *Lookout* POCs, or anonymously using the *Lookout* boxes located in the HQ, OSB I, and O&C cafeterias.

Thank Youz!!!

The goal for this year's Safety and Health Days program was to offer training that was informative as well as entertaining. We created training videos on topics that directly affect KSC employees. It required extraordinary planning and coordinating to meet these goals and we would like to thank the following individuals for all of their time and effort in making this year's program such a success! If you personally know any of these individuals, please offer your thanks and congratulations for a job well done.
